

Broker.cpp

main.cpp

Broker.h

```
graph TD; BrokerCpp[Broker.cpp] --> BrokerH[Broker.h]; MainCpp[main.cpp] --> BrokerH;
```

The diagram illustrates the relationship between three C++ files. At the top, there are two white rectangular boxes with black borders. The left box contains the text 'Broker.cpp' and the right box contains 'main.cpp'. Below these, centered, is a black rectangular box with the text 'Broker.h' in white. Two blue arrows originate from the bottom center of each of the top boxes and point downwards to the top edge of the bottom box, indicating that both Broker.cpp and main.cpp include or depend on Broker.h.
