n : microbio records, csp: one causing disease.

Probably the amount of sampling tape used in the makin' of this cd may cover my entire house, but does this work worth it? Does it worth making more music in a world full of nonsense shitty and terrible projects exploring known and common paths and who consider themselves pioneers because of an excessive lack of knowledge? We are not pioneers....I doubt someday we really are ...besides, we'll never produce something new....and that's the way we are and that's the way we're going to be.

Servirá de algo producir más música en este mundo plagado de grupos terribles y proyectos sin sentido que pretenden explorar caminos ya explorados por otros mil y que por falta de conocimiento se consideran pioneros? nosotros no lo somos...de hecho, dudo que algún día seamos pioneros....además, nunca haremos nada que suene a nuevo.....así somos y así siempre seremos.

Es posible que la cantidad de cinta de muestreo utilizada para realizar este ep pueda cubrir una casa completa...pero de verdad habrá valido la pena?
