

## **TIMEZONE 3.1 README**

-----  
TimeZone is a program that shows up to twelve time zones relative to your local time. The time zone displays are customizable to the hour and minute offset necessary. Version 3.1 adds Windows XP support, and a fully MSI-compliant installer. All of your settings are saved automatically when you close TimeZone. TimeZone is now shareware, and costs \$15 US as a one-time payment with free upgrades; you may order it at <http://www.victechsoftware.com/register.html>. You may use TimeZone up to 25 times before being required to register. This program requires the Visual Basic 6.0 runtimes (MSVBVM60.DLL) and the Microsoft Windows Installer to install. Please uninstall any previous versions of TimeZone before installing version 3.1.

## **VERSION HISTORY**

-----  
Version 3.0 - Adds ability to change the number of time zone panels, translucency in Windows 2000 and XP, and a local system time display.

Version 2.2 - Support for time zones up to 24 hours away, added method to check for program updates, settings saved automatically upon exit of program

Version 2.1 - Added the ability to name the time zones as well as options for importing and exporting the TimeZone settings

Version 2.0 - Complete remake of TimeZone, added start to system tray and system tray support.
