Abstract

This bibliography records publications of Beny Neta.

Title word cross-reference

References

Cersovsky:1995:ADA

[CKMN95] D. Cersovsky, E. Kleinschmidt, B. Mansager, and B. Neta. Audio detection algorithms in combat simulations. *International J. Mathematical and Computer Modelling*, 1995. accepted for publication.

Chawla:1984:NCL

[CN84] M. M. Chawla and B. Neta. A new class of linearly implicit single-step P-stable methods for second order initial-value problems. Technical Report INTT-28, Institute for Numerical Transport Theory, Texas Tech University, Lubbock, TX, 1984.

Chawla:1986:FTS

[CN86] M. M. Chawla and B. Neta. Families of two-step fourth order P-stable methods for second order differential equations. *Journal of Comp. and Appl. Math.*, 15:213–223, 1986.

Chawla:1986:TSF

[CRN86] M. M. Chawla, P. S. Rao, and B. Neta. Two-step fourth order P-stable methods with phase-lag of order six for $y'' = f(t, y)$. *Journal of Comp. and Appl. Math.*, 16: 233–236, 1986.

Danielson:1994:SST

[DNE94] D. A. Danielson, B. Neta, and L. W. Early. Semianalytic satellite theory (SST): Mathematical algorithms. Technical Report NPS-MA-94-001, Department of Mathematics, Naval Postgraduate School, Monterey CA 93943, USA, 1994.

Gragg:1989:FSE

[GN89] W. Gragg and B. Neta. Fortran subroutines for the evaluation of the confluent hypergeometric functions. Technical Report NPS-MA-89-014, Department of Mathematics, Naval Postgraduate School, Monterey CA 93943, USA, 1989. Software available URL http://math.nps.navy.mil.

Lustman:1991:SPS

[LN91] L. Lustman and B. Neta. Software for the parallel solution of systems of ordinary differential equations. Technical Report NPS-MA-91-009, Department of Mathematics, Naval Postgraduate School, Monterey CA 93943, USA, 1991. Software available URL http://math.nps.navy.mil.

Lustman:1992:SPC

[LN92] L. Lustman and B. Neta. Software for the parallel conservative scheme for the shallow water equations. Technical Report NPS-MA-92-004, Department of Mathematics, Naval Postgraduate School, Monterey CA 93943, USA, 1992. Software available URL http://math.nps.navy.mil.

Lustman:1992:SOD

[LNG92] L. Lustman, B. Neta, and W. Gragg. Solution of ordinary differential initial value problems on an INTEL hypercube. *Computers and Mathematics with Applications*, 23:65–72, 1992.

Lustman:1991:SLO

[LNK91] L. Lustman, B. Neta, and C. P. Katti. Solution of linear ordinary differential systems on an INTEL hypercube. *SIAM J. Scient. Stat. Comput.*, 12:1480–1485, 1991.

Neta:1988:TFA

[ND88] B. Neta and C. L. DeVito. The transfer function analysis of various schemes for the two dimensional shallow-water equations. *Computers and Mathematics with Applications*, 16:111–137, 1988.

Neta:1992:PCM

[ND92] B. Neta and D. A. Danielson. Parallel computing may improve space surveillance. *ONR Naval Research Review*, 44:54, 1992.

Neta:1994:PAO

[NDOB94] B. Neta, D. A. Danielson, S. Ostrom, and S. K. Brewer. Performance of analytic orbit propagator on a hypercube and a workstation cluster. In *AIAA-AAS Astrodynamics Program*, pages 10–34. American Institute of Aeronautics and Astronautics, Aerospace Center, 370 L'Enfant Promenade, SW, Washington, DC 20024-2518, August 1994. Paper number 94-3706.

Neta:1977:FEAb

[Net77] B. Neta. *Finite Element Approximation of a Nonlinear Diffusion Problem.* PhD thesis, Carnegie-Mellon University, Schenely Park, Pittsburgh, PA 15213, July 1977.

Neta:1978:FEA

[Net78] B. Neta. Finite element approximation of a nonlinear parabolic problem. *Computers and Mathematics with Applications*, 4:247–255, 1978.

Neta:1979:SOF

[Net79] B. Neta. A sixth-order family of methods for nonlinear equations. *International J. Computer Mathematics*, 7:157–161, 1979.

Neta:1980:I

[Net80a] B. Neta. On 3 inequalities. *Computers and Mathematics with Applications*, 6:301–304, 1980.

Neta:1980:DBP

[Net80b] B. Neta. On determination of best-possible constants in integrals inequalities involving derivatives. *Mathematics of Computation*, 35:1191–1194, 1980.

Neta:1981:NIM

[Net81a] B. Neta. A new iterative method for the solution of systems of nonlinear equations. In Z. Ziegler, editor, *Approximation Theory and Applications*, pages 249–263. Academic Press, New York, NY, USA, 1981. ISBN 0-12-780650-4.

Neta:1981:NEAa

[Net81b] B. Neta. Note on error analysis for the spectral synthesis method with interfaces. *Zeitschrift fur Angewandte Mathematik und Physik*, 32:603–608, 1981.

Neta:1981:NEAb

[Net81c] B. Neta. Note on error analysis for the spectral synthesis method with interfaces. Technical Report INTT-12, Institute for Numerical Transport Theory, Texas Tech University, Lubbock, TX, 1981.

Neta:1981:FMM

[Net81d] B. Neta. On a family of multipoint methods for nonlinear equations. *International J. Computer Mathematics*, 9:353–361, 1981.

Neta:1982:NSNa

[Net82a] B. Neta. Numerical solution of a nonlinear integro-differential equation. *J. Math. Anal. Appl.*, 89:598–611, 1982.

Neta:1982:NSNb

[Net82b] B. Neta. Numerical solution of a nonlinear integro-differential equation. Technical Report INTT-21, Institute for Numerical Transport Theory, Texas Tech University, Lubbock, TX, 1982.

Neta:1983:NFH

[Net83] B. Neta. A new family of higher order methods for solving equations. *International J. Computer Mathematics*, 14:191–195, 1983.

Neta:1984:AMN

[Net84a] B. Neta. Adaptive method for the numerical solution of Fredholm integral equations of the second kind. part II: Singular kernels. In A. Gerasoulis and R. Vichnevetsky, editors, *Numerical Solution of Singular Integral Equations*, pages 249–263. IMACS, Department of Computer Science, Rutgers University, New Brunswick, NJ, 1984.

Neta:1984:HOH

[Net84b] B. Neta. Higher order hybrid Störmer–Cowell methods for ordinary differential equations. *Congressus Numerantium*, 42:251–264, 1984.

Neta:1985:HPC

[Net85] B. Neta. Hybrid predictors and correctors for solving a special class of second order differential equations. *Congressus Numerantium*, 46:241–248, 1985.

Neta:1986:FBD

[Net86a] B. Neta. Families of backward differentiation methods based on trigonometric polynomials. *International J. Computer Mathematics*, 20:67–75, 1986.

Neta:1986:SMP

[Net86b] B. Neta. Special methods for problems whose oscillatory solution is damped. Technical Report NPS-53-86-012, Department of Mathematics, Naval Postgraduate School, Monterey CA 93943, USA, 1986.

Neta:1987:SNS

[Net87] B. Neta. Several new schemes for solving equations. *International J. Computer Mathematics*, 23:265–282, 1987.

Neta:1988:ESD

[Net88] B. Neta. The effect of spatial discretization on the steady-state solution of the shallow water equations. In H. Niki and M. Kawahara, editors, *Computational Methods in Flow Analysis*, volume 2, pages 1041–1048. Okayama, Japan, September 1988.

Neta:1989:ATZb

[Net89a] B. Neta. Analysis of the Turkel-Zwas scheme for the shallow water equations. In W. F. Ames, editor, *Numerical and Applied Mathematics*, volume 1(3), pages 257–264. IMACS, Department of Computer Science, Rutgers University, New Brunswick, NJ, 1989.

Neta:1989:SMP

[Net89b] B. Neta. Special methods for problems whose oscillatory solution is damped. *Applied Mathematics and Computation*, 31:161–169, 1989.

Neta:1992:AFE

[Net92a] B. Neta. Analysis of finite element and finite differences for shallow water equations: a review. *Mathematics and Computers in Simulation*, 34:141–161, 1992.

Neta:1992:SOD

[Net92b] B. Neta. Solution of ordinary differential initial value problems on an INTEL hypercube with applications to orbit determination. In A. J. Coster and K. P. Schwan, editors, *1992 Space Surveillance Workshop*, volume 1, pages 205–208. M.I.T. Lincoln Laboratory, Lexington, MA, April 1992.

Neta:1994:PSI
